1. Receiver Deployment

1.1. Customer Readiness Worksheet

Customer to Complete Prior to Installation Start

- (a) Name of virtual switch: _____
- (b) WAN/Public IPv4 address: _____ (Must be static IP)
- (c) LAN0 Private IPv4: _____
- (d) Name of virtual switch: _____

1.2. Network Requirements

Customer to set the following edge firewall rules as follows

Firewall Requirements

Direction	From	To	DST Port	Protocol
In	67.225.220.203 ²	Receiver wan0	22	TCP
In	ALL	Receiver wan0	443	TCP
Out	Receiver wan0	<u>ubuntu.com</u>	80	TCP
Out	Receiver wan0	<u>ubuntu.com</u>	443	TCP
Out	Receiver wan0	<u>ubuntu.com</u>	123	UDP
Out	Receiver wan0	<u>canonical.com</u>	80	TCP
Out	Receiver wan0	<u>canonical.com</u>	443	TCP
Out	Receiver wan0	<u>canonical.com</u>	123	UDP
Out	Receiver wan0	<u>smtp.gmail.com</u> ¹	587	TCP
Out	Receiver wan0	67.225.220.131 ²	5680	TCP
Out	Receiver wan0	67.225.220.110 ²	443	TCP

¹ Please note during the registration of the Blacksands Receiver, outgoing TLS SMTP connection to smtp.gmail.com over port 587 is required. After device registration this requirement can be turned off.

² Blacksands Private Cloud

1.3. Acquiring Receiver Appliance

Go to <https://s3.amazonaws.com/bsi-release/www/index.html> and click on the “Download Receiver Appliance”. Once downloaded please perform a file integrity check using the following commands:

Linux : shasum -a 256 BlacksandsReceiver_v{version}.ova
OSX : shasum -a 256 BlacksandsReceiver_v{version}.ova
Windows : sha256sum.exe BlacksandsReceiver_v{version}.ova

The output of the above commands will render a 64 character alpha numeric string, please verify this string with the “Secure Hash Algorithm” from the above download page.

1.4. VMware Requirements

- (a) VMWare 6.0+
- (b) Four(4)+ Processors / Sockets
- (c) Four(4)+ GB (4096 MB) RAM
- (d) Eighty(80) GB Storage

1.5. VMWare Deployment of Blacksands Receiver OVA

- (a) Select Create / Register VM, select Deploy a virtual machine from OVF or OVA files then click Next (see Diagram 1.)

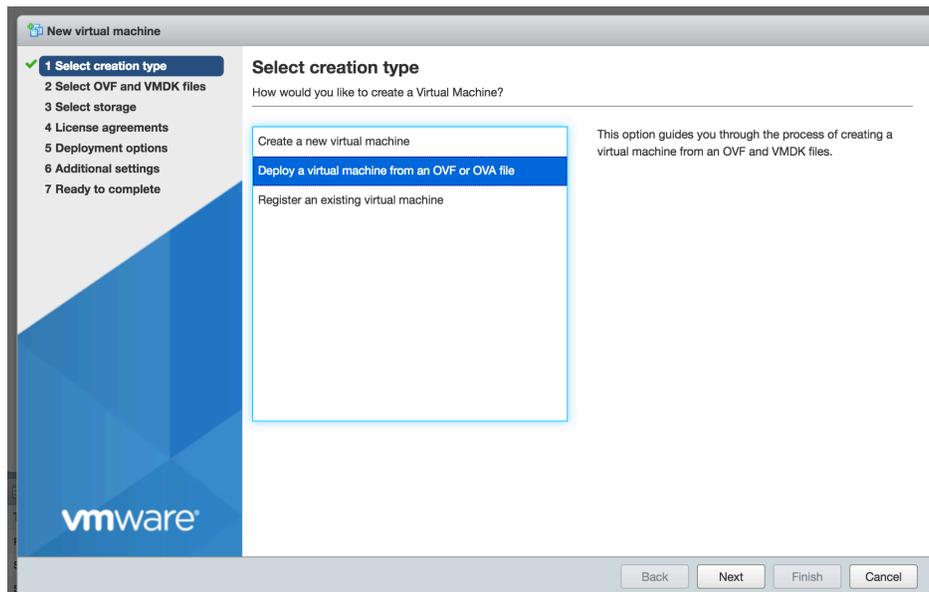

Diagram 1

- (b) Add Name and drag the BlacksandsInc_Receiver_vXX.ova into the blue box and click Next (see Diagram 2). Select Storage and click Next.

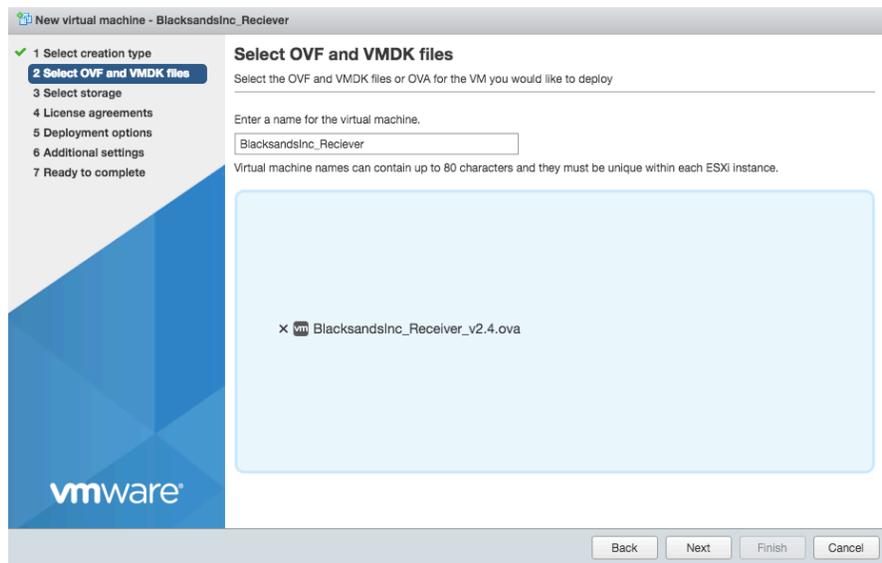

Diagram 2

- (c) Select Deployment Options and click Next.
 (d) Review the settings and click **Next** at **Ready to complete** (see Diagram 3).

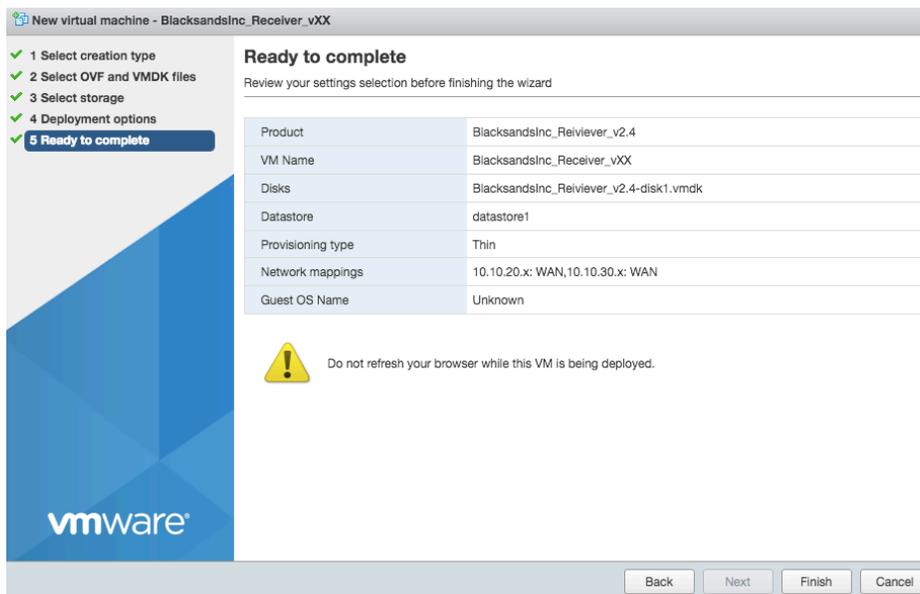

Diagram 3

1.8. Setting Up Networking

- (a) The initial settings are WAN0 - DHCP and LAN0-LAN3 DISABLED
- (b) The first change will be to setup networking for WAN0
- (c) Type 'set' and then hit 'TAB'. This will provide you with the the different 'set' functions available (see diagram 6).

```
bsiuser@config:~# set
lan0 lan1 lan2 wan0
```

Diagram 6

- (d) Type **set wan0**

```
bsiuser@config:~# set wan0
Please select dhcp or static or off
[dhcp/static/off/back]: static
IPv4 Address: [REDACTED]
IPv4 Subnet Mask: 255.255.255.248
IPv4 Gateway: [REDACTED]
Please enter DNS seperated by spaces
IPv4 DNS: 8.8.8.8
```

Diagram 7

- (e) Then input the appropriate networking information including; Address, Subnet, Gateway, and DNS.
- (f) You can also set one of the LAN interfaces for the internal network in the same way.
- (g) Anytime you adjust networking on the Receiver, the device will need to be restarted for the changes to take effect.
- (h) Type 'restart' in order to force the rebooting of the Receiver. You will be required to confirm this request.

1.9. Viewing Network Adapters

In order to view WAN0, LAN0-3 you can view the current adapter settings. Type 'adapters show' and it will list the current settings.

```
bsiuser@config:~# adapters show
```

Name	Setting	IP	NetMask	Gateway	Speed	Duplex	Link
lan0	dhcp	192.168.1.15	255.255.255.0	proto	10000Mb/s	Full	yes
lan1	manual	Not Set	Not Set	Not Set	10000Mb/s	Full	yes
lan2	manual	Not Set	Not Set	Not Set	10000Mb/s	Full	yes
wan0	static	108.203.128.68	255.255.255.248	108.203.128.70	10000Mb/s	Full	yes

Diagram 8

1.10. Registering Receiver

- (a) Type 'registration start'. You will be prompted to confirm the registration of this Receiver. Note, that this resets the Receiver in the system. This also **REQUIRES** proper networking. We suggest utilizing some of the other networking tools prior to Registering the Receiver (i.e. 'arp', 'speedtest', 'adapters')

```
bsiuser@config:~# registration
complete reset start
bsiuser@config:~# registration start
Do you want to register this instance? [yes/no]: yes
```

Diagram 9

- (b) You will be asked for two emails. The first is an 'Admin Email'. This is a member of your organization that is already a valid Blacksands' Administrator. He/she will receive an email requesting approval of this Registration process for your organization.

The second email is your email (the person installing the Receiver). This email address will be used to report on any changes to the Blacksands' Receiver. These 2 email addresses may be the same for a given organization.

```
bsiuser@config:~# registration start
Do you want to register this instance? [yes/no]: yes

Please Read .....

This device can only be registered by a valid blacksands member that has admin privileges.
You will be prompted for an admin email address.
Continue ? [yes/no]: yes
Enter Admin Email or quit: [redacted] n
Enter Admin Email or quit: [redacted] n

Please Read .....

You will be prompted for your email address.
This email address will be used for any updates
Continue ? [yes/no]: yes
Use: [redacted] n [yes/no]: yes
One moment please.....
One moment please.....
One moment please.....
One moment please.....
bsiuser@config:~#
```

Diagram 10

- (c) You will receive an email that the registration is complete. The registration process may take a few minutes.
- (d) At the console type **registration complete**. If you receive a 'Could not retrieve the package, exiting' error. Wait a few minutes and try again.

```
bsiuser@config:~# registration complete
```
